

About Sigma Technology Partners

Sigma Technology Partners, LLC is an SBA 8(a) certified, Woman Owned Small Business based in Arlington, Virginia. We deliver quality services to both government and private sector. Sigma Technology Partners offers solutions and resources for FISMA Compliance, FedRAMP Readiness Assessment, ISO 27001 Readiness Assessment and Managed Cyber Security services.

The cornerstone of our practice philosophy is the delivery of solution-based, high quality services to our clients. This philosophy includes competence, integrity, objectivity, and exceptional problem-solving skills by all professionals assigned to engagements. Sigma Technology has the experience and tools necessary to address the cyber security challenges of our clients. We organize our work and our people to create impact, applying emerging technology and a mission-first mindset to meet our client's needs.

Sigma Technology delivers innovative, cost effective solutions to government agencies and private companies to help them tackle their biggest cyber security challenges and achieve mission success.

CAPABILITIES STATEMENT

Practice Philosophy

The cornerstone of our practice philosophy is the delivery of solution-based, high quality services to our clients. This philosophy includes competence, integrity, objectivity, and exceptional problem-solving skills by all professionals assigned to engagements. Sigma Technology has the experience and tools necessary to address the cyber security challenges of our clients. Sigma Technology has developed a comprehensive framework for conducting cyber security assessment for our clients. This framework has been used successfully in our federal, state, and private business engagements. Our solutions include full spectrum of services and products to assist executive, higher management, and program offices in executing programs on-cost, on-schedule and on-performance.
