

Managed Security Services Vulnerability Scanning And Mitigation

All-in-One Vulnerability Management, Detection, and Response Platform

VULNERABILITY MANAGEMENT (VM)

Map and scan our customers' network to determine where are vulnerabilities to the latest threats.

Common services include:

- Industry Compliance Assessment
- Security Program Assessments
- Incident Response
- Managed Security services

THREAT PROTECTION (TP)

Visualize and prioritize our customer's active threats with at-a-glance dynamic dashboards.

Common services include:

- Security Posture Assessments
- Zero-Day-Threat Assessments
- External Security Assessments
- Managed Security Services

WEB APPLICATION SCANNING (WAS)

Easily Discover critical vulnerabilities such as SQL injections and cross site scripting on web applications.

Common Services include:

- Web Application Assessments
- Security Program Assessments
- External Security Assessment
- Source Code Review

POLICY COMPLIANCE (PC)

Help our customers pass security and compliance audits tied to policies, laws and regulations.

Common services include:

- Industry Compliance Assessments
- Security Program Assessments
- Compliance with Benchmarks (CIS, NIST)
- Security Configuration Assessment

PCI COMPLIANCE (PCI)

Prepare customers of all sizes for ASV certifications and QSA audits by running PCI readiness reports.

Common services include:

- PCI Readiness Assessment
- PCI Compliance Road Mapping
- Payment Infrastructure Assessments
- Streamed lined scanning and remediation

PATCH MANAGEMENT (PM)

Automatically discover, prioritize and remediate vulnerabilities using the Qualys Cloud Agent.

Common services include:

- Patch OS and 3rd party apps
- Patch remote systems
- Patch workflow automation and prioritization
- Full remediations lifecycle

A Single Solution for risk-based cybersecurity discovery, assessment, detect, and response

Redefining Cyber Risk Management for the Enterprise

Asset Discovery

Detect and inventory all known and unknown assets that connect to your global hybrid IT environment – including on-premises devices and applications, mobile, endpoints, clouds, containers, OT, and IoT. Includes Passive Scanning Sensors.

Asset Inventory

On-premises Device Inventory: Detect all devices and applications connected to the network.
Certificate Inventory: Detect all TLS/SSL digital certificates.
Cloud Inventory: Discovery of assets across public cloud platforms.
Mobile devices inventory: Detect and catalog Android, iOS/iPad OS devices across the enterprise.

Threat Protection

Pinpoint your most critical threats and prioritize patching. Using real-time threat intelligence and machine learning, take control of evolving threats and identify what to remediate first.

ITSM Tool Integration

Rule-based integrations with ITSM tools (ServiceNow, JIRA) automatically assign tickets and enable orchestration of remediation, further reducing MTTR

Sigma Technology Partners is an enterprise IT solutions Company. We provide compliance consulting, Cybersecurity, and Managed Security Provider (MSP) services to the government and private sector. We offer solutions and resources for FISMA compliance, FedRAMP Readiness Assessment, ISO/IEC 27001 Compliance consulting, Threat and Vulnerability Assessment, Cloud Architecture Assessment and Penetration Services.

Sigma Technology helps organizations develop and optimize security operations, bridging the gap with critical cyber defense functions. Our world-class cyber defense services delivery differentiates us from any of our competitors. We have a pool of skilled and certified technical and business employees, who are positioned to rapidly assemble these skills as necessary to support the client's needs.
